Project Overview

Open Books is a Chicago-based nonprofit working to make reading more accessible for kids and families. Current information architecture is confusing, making it difficult to support the organization or get involved.

Objective: Make site navigation more intuitive to increase support and engagement.

Process

1. Content Inventory
2. Card Sort
3. Tree Test
4. Sitemap
5. Heuristic Analysis
6. Wireframes

User Profiles

Jamee

Jamee's son recently moved into his college dorm and she's downsizing, including getting rid of some of her books. Through the website, she learns how the books she plans to donate will support literacy programs, checks the condition requirements and finds a nearby drop-off location.

Kyle

Kyle's new year's resolution is to give back. He remembers when he was in the Open Books reading program when he was younger. He'd like to give back to the program through a donation and uses the website to do so.

Devon

Devon is a teacher looking for new books for her classroom. She wants to buy books but also support a great cause. Through the website, she learns that her purchase will support the Open Books literacy program and continues to purchase classroom books online.

Content Inventory

Key Findings

Redundant links

The site had an online shopping link for each store location which led to the same site, so they could be condensed.

Dead links

The site had a few links that were no longer active and led to dead ends that we could get rid of.

Unclear organization

- Programs listed outside of the programs tab
- Support actions buried in the about section
- Not all locations listed in the main navigation
- Location information in same tab as online shopping information

Content Inventory

Proposed Categories

About

Programs

Proposed to condense program information into one location.

Locations

Proposed to condense location information in one place.

Support

Proposed to make sure that all support actions were in one place and clearly labeled, rather than buried in different areas.

Shop

Proposed to separate location information from online shopping information.

Contact

Card Sort

Pilot Test

CLOSED SORT | 1 PARTICIPANT

Successes

- Category naming conventions weren't confusing to participants

Challenges

- Typos
- Lack of context about the site
- Specific cards:
 - Events: Didn't have a requisite category
 - North Lawndale Reads: Name caused confusion

Adjustments

- Fixed typos
- Clarified the website type in the introduction page
- Moved Events to the primary navigation
- Separated North Lawndale Reads into two cards based on page content ("After School Program" and "Sensory Saturdays")

Card Sort

Round 1

CLOSED SORT | 5 PARTICIPANTS

Success - Card sorted into the same group by 80% of participants or more.

Successful Cards

- Reading Buddies in Programs
- Parent and Caregiver Workshops in Programs
- Donate in Support
- Online Store in Shop
- General Inquiries in Contact
- Gift Cards in Shop

Problem Cards

- Access to Books: Scattered sorting
- Buy Books for Kids: Split between Programs and Support

Adjustments

- Renamed “Access to Books” to “Grant Information” to better represent page content
- Renamed “Buy Books for Kids” to “Gift a Book” to make it clear that it’s a user action
- Renamed “Support” category to “Support Us” for clarity

Card Sort

Round 2

CLOSED SORT | 10 PARTICIPANTS

Success - Card sorted into the same group by 80% of participants or more.

Successful Cards

- New “Grant Information” card in About
- Donate in Support
- Volunteer in Support
- Sensory Saturdays in Programs
- After School Program in Programs

Problem Cards

- Gift a Book: Split between Shop and Support Us
- Open Books Mobile: Unclear that this is a program

Adjustments

- Renamed “Gift a Book” to “Books for Kids” to follow the organization scheme and better reflect content
- Renamed “Open Books Mobile” to “Open Books on Wheels” to better reflect content

Tree Test Pilot Tasks

Task One

You want to visit the Pilsen location of the nonprofit, but aren't quite sure about their hours. Where would you find this information?

Task Two

You want to get more involved in the community and think that volunteering would be a good way to do that. Where would you find information about volunteering for the nonprofit?

Task Three

You want to learn more about the programs that the nonprofit offers, specifically the Dolly Parton Imagination Library. Where would you find information about this program?

Tree Test

Pilot Test

1 PARTICIPANT

Successes

- Task phrasing made sense, participants understood what was asked of them.

Challenges

- Lack of context about Open Books inside the tasks
- Task 3 was leading by telling participants that the requested information was a program.

Adjustments to tasks

- You want to visit the Pilsen location of **Open Books**, but aren't quite sure about their hours. Where would you find this information?
- You want to get more involved in the community and think that volunteering would be a good way to do that. Where would you find information about volunteering **for Open Books**?
- You heard that Open Books was **working with** the Dolly Parton Imagination Library and want to learn more. Where would you find this information?

Tree Test

Round 1

5 PARTICIPANTS

Success - Participant was able to identify where the requested information lived in the sitemap.

- Task 1: 5/5 participants successful
- Task 2: 5/5 participants successful
- Task 3: 4/5 participants successful

These results led us to believe that the navigation is intuitive and makes sense. Rather than make unfounded changes to the sitemap, We decided to retest and see if we would get the same results in the second round.

Tree Test

Round 2

9 PARTICIPANTS

Success - Participant was able to identify where the requested information lived in the sitemap.

- Task 1: 9/9 participants successful
- Task 2: 7/9 participants successful
 - 2 with direct success
- Task 3: 8/9 participants successful
 - 3 with direct success

One participant was taken out of this analysis due to taking only 30 seconds to complete the study and getting each task wrong, indicating that they were not putting forth effort.

These results indicate that our sitemap is navigable, although in a roundabout way. We suspect that this may be due to a lack of attention by the participants, as we pulled from the CDM participant pool. It was close to the end of the semester and it's likely that people doing studies at that time were looking for easy tasks for extra credit and didn't pay attention to what they were being asked to do.

Sitemap

Creation

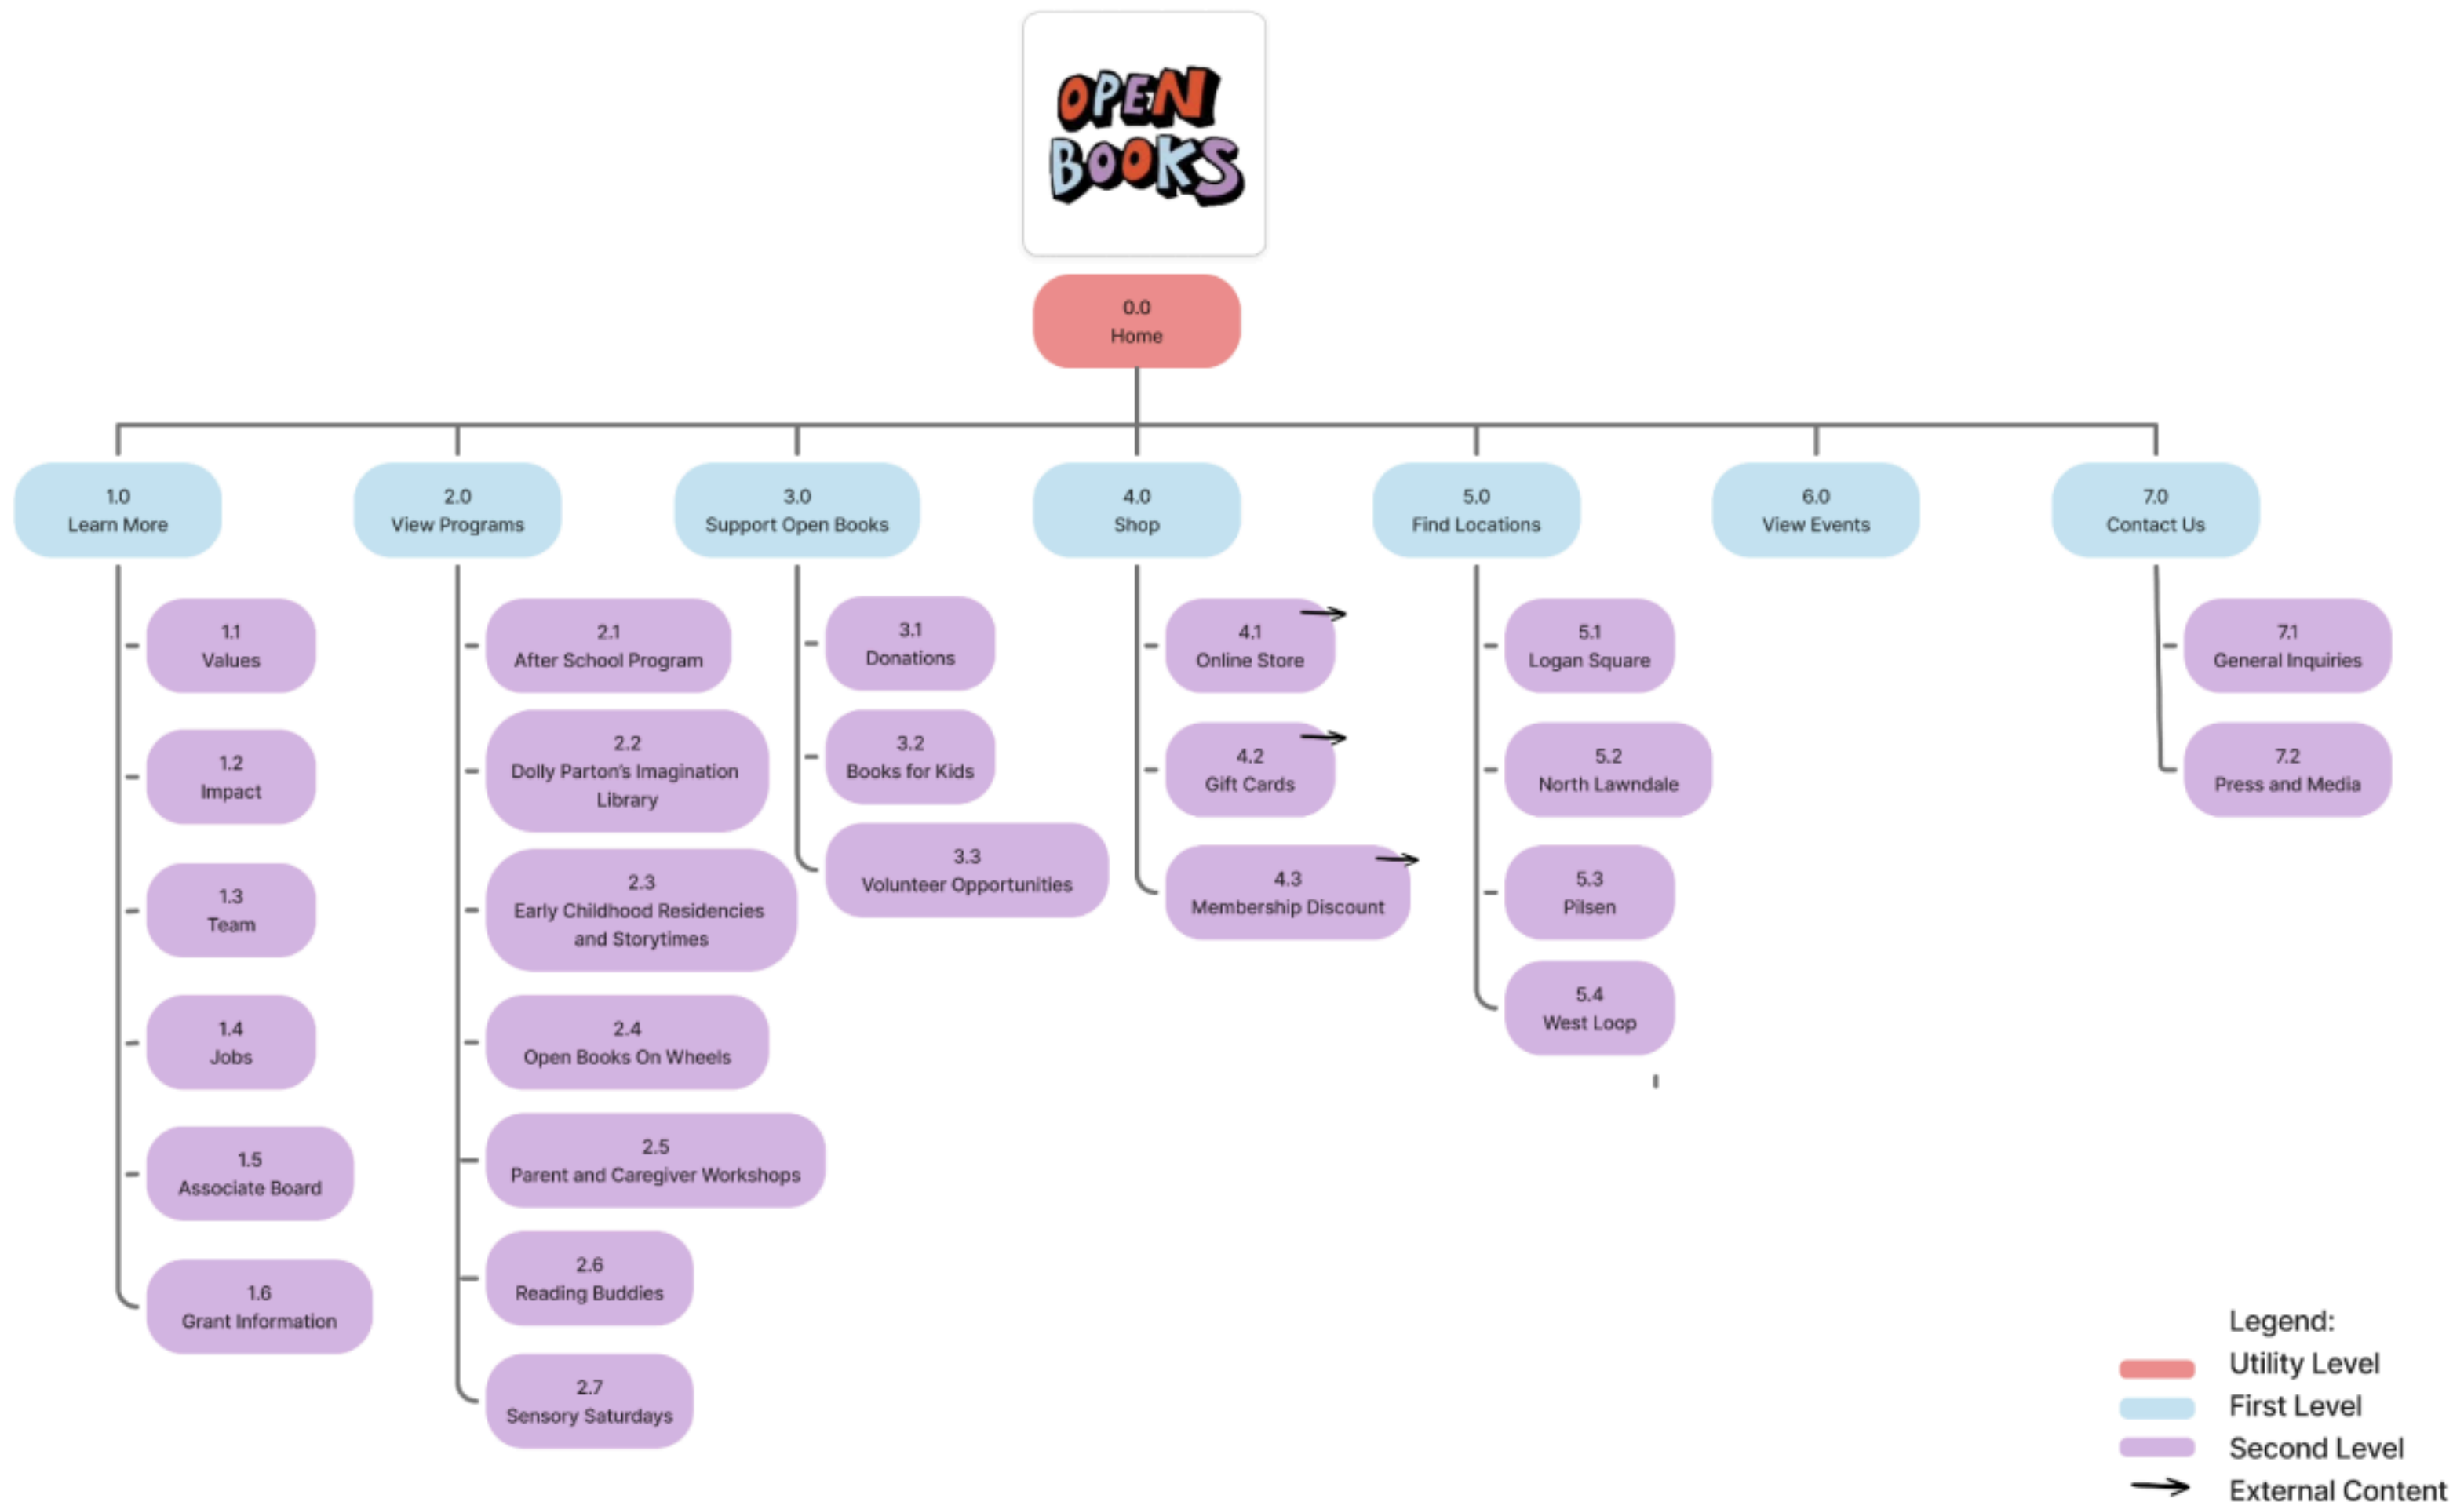

- We created a rough sitemap before the first card sort, guessing where each card would go

Revisions

- After each round of the card sort, we moved cards into their most sorted categories when there was clear consensus
- We also changed the names of pages to reflect the names that they were given in different iterations of the card sort

Final

- Action based top level
- Topical based second level

Heuristic Analysis

Task 1

Task 1: Donate to the nonprofit

AVERAGE SCORE: 3.24/5

Issues identified:

- Lack of feedback
- Doesn't follow mental models for donation action
- Misinterpretation possible: The form does not explain tribute donations

Recommendations

- Add feedback for incorrect information
- Add area to input payment information
- Add a link to a description of tribute donations to prevent lack of understanding

Heuristic Analysis

Task 2

Task 2: Purchase a book

AVERAGE SCORE: 2.95/5

Issues identified:

- Visually inconsistent (different text sizes and layouts on the same page)
- Misleading symbols
- Does not support undo/redo

Recommendations

- Add feedback for incorrect information
- More consistent visual styling
- Inclusion of undo function

Wireframes

Overview

Successes

- Applying heuristic evaluation findings
- Experience with iterative design

Challenges

- **Designing optional steps within the donation flow:** We had to consider how to integrate optional information (e.g. tribute and acknowledgment details) while keeping the flow clear and easy to navigate.
- **Limited feedback:** With more time, it would have been helpful to seek more feedback from our peers and professor.

Wireframes

Task 1

Changes Made

- Split form into multiple steps
- Consistent visual styling
- Added a section to collect payment information
- Added a link to information about tribute donations
- Added feedback for incorrect information

Step 1 of 4: Donation Amount

Retrospective

Successes

- Informative card sort data helped organize the site intuitively

Challenges

- Poor tree test data did not inform the sitemap, could still be problems with our current version

Future Directions

- Conduct another round of tree testing with a different population for better results
- Analyze new tree test data to better revise and iterate on sitemap
- Usability testing

Contributions

Wireframes

Task 2 Annotations

Open Books - Checkout Flow (Annotated)

Group 2: Al Rajala, Laurie Williams, and Kaleigh Spitzer

2.0 Cart Contents

The wireframe for the '2.0 Cart Contents' screen shows the 'OPEN BOOKS' logo at the top left and a hamburger menu icon at the top right. Below the logo is the 'Cart Contents' section. It features a product card for 'Desert Creatures' by Kay Boyle, priced at \$8.00, with a quantity selector set to 1. A red 'Proceed to Checkout' button is located at the bottom of the cart section. A progress indicator at the top shows five steps: 1 (Cart), 2 (Details), 3 (Ship), 4 (Pay), and 5 (Review), with step 1 being the active step.

- 1 Cart summary displays item details, including quantity and price. Gives user opportunity to review before continuing to checkout process.
- 2 Quantity selector allows adjustments without leaving cart. Prevents users from having to go back to product page to change quantity.
- 3 "Proceed to Checkout" button advances to multi-step checkout flow.

2.1 Confirm Cart Details

The wireframe for the '2.1 Confirm Cart Details' screen shows the 'OPEN BOOKS' logo at the top left and a hamburger menu icon at the top right. Below the logo is the 'Confirm Cart Details' section. It features a product card for 'Desert Creatures' by Kay Boyle, priced at \$8.00, with a quantity selector set to 1. A red 'Continue to Details' button is located at the bottom of the section. A progress indicator at the top shows five steps: 1 (Cart), 2 (Details), 3 (Ship), 4 (Pay), and 5 (Review), with step 2 being the active step.

- 4 Progress indicator shows current step. Reduces anxiety about form length and helps users gauge time commitment.
- 5 "Continue to Details" allows user to confirm cart details before entering information.

2.2 Your Information

The wireframe for the '2.2 Your Information' screen shows the 'OPEN BOOKS' logo at the top left and a hamburger menu icon at the top right. Below the logo is the 'Your Information' section. It features a progress indicator at the top showing five steps: 1 (Cart), 2 (Details), 3 (Ship), 4 (Pay), and 5 (Review), with step 3 being the active step. The form includes fields for First Name, Last Name, Email, and Phone. Below these is the 'Billing Address' section with fields for Address Line 1, Address Line 2, City, State, and ZIP. A checkbox for 'Same as billing address' is located below the ZIP field. A red 'Continue to Shipping' button is at the bottom.

- 6 Email required for order confirmation and shipping updates. Validation prevents typos.
- 7 "Same as billing address" checkbox eliminates redundant data entry when shipping and billing are identical.
- 8 System checks for errors in fields entered when user selects "Continue to Shipping."

2.3 Select Delivery Option

The wireframe for the '2.3 Select Delivery Option' screen shows the 'OPEN BOOKS' logo at the top left and a hamburger menu icon at the top right. Below the logo is the 'Select a Delivery Option' section. It features a progress indicator at the top showing five steps: 1 (Cart), 2 (Details), 3 (Ship), 4 (Pay), and 5 (Review), with step 3 being the active step. The form includes three radio button options: 'Standard Shipping' (5-14 business days), 'Store Pick-Up: West Loop' (Same day), and 'Store Pick-Up: Logan Square' (3-4 business days). A red 'Continue to Payment' button is at the bottom.

- 9 Shipping options display cost and estimated delivery time.
- 10 "Continue to Payment" advances only after shipping selection.

2.4 Payment

The wireframe for the '2.4 Payment' screen shows the 'OPEN BOOKS' logo at the top left and a hamburger menu icon at the top right. Below the logo is the 'Payment Information' section. It features a progress indicator at the top showing five steps: 1 (Cart), 2 (Details), 3 (Ship), 4 (Pay), and 5 (Review), with step 4 being the active step. The form includes fields for Card Number, Cardholder Name, Expiration Date, and CVV. A red 'Review Order' button is at the bottom.

- 11 Real-time feedback/card validation catches errors before submission attempt.
- 12 "Review Order" advances to final confirmation. Does NOT process payment yet - gives user one last chance to verify everything before charging card.

2.5 Review

The wireframe for the '2.5 Review' screen shows the 'OPEN BOOKS' logo at the top left and a hamburger menu icon at the top right. Below the logo is the 'Review' section. It features a progress indicator at the top showing five steps: 1 (Cart), 2 (Details), 3 (Ship), 4 (Pay), and 5 (Review), with step 5 being the active step. The form includes four sections: 'Order' (Desert Creatures, \$8.00, Qty: 1), 'Bill To' (John Smith, john@email.com, (312) 555-6666, 123 Main St, Chicago, IL 60601), 'Ship To' (John Smith, 123 Main St, Chicago, IL 60601), and 'Payment' (Card Number: **** * 3456, Expiration Date: 12/27). A red 'Place Order' button is at the bottom.

- 13 Complete order summary with all details (items, shipping, billing, payment).
- 14 "Edit" links allow changes to specific sections without losing all data. Users can fix errors without restarting checkout.
- 15 "Place Order" button processes payment and completes transaction.

2.6 Order Confirmation

The wireframe for the '2.6 Order Confirmation' screen shows the 'OPEN BOOKS' logo at the top left and a hamburger menu icon at the top right. Below the logo is the 'Order Confirmation' section. It features a green checkmark icon at the top. The text reads: 'Thank you for your purchase! We will email you once the order has been shipped.' Below this is the 'Order Summary' section, which includes a product card for 'Desert Creatures' by Kay Boyle, priced at \$8.00, with a quantity of 1. Below the summary is the 'Billing Information' section, which includes fields for Name, Address, Phone, and Email. A red 'Return to Home' button is at the bottom.

- 16 Success confirmation with order number provides reassurance.
- 17 Order summary displays all transaction details. Serves as receipt.
- 18 "Return to Home" clears session and returns to main site. Provides clear exit from checkout flow after successful purchase.
